Recommendations (optional): In this section, provide recommendations, related to controls and/or compliance needs, that your IT manager could communicate to stakeholders to reduce risks to assets and improve Botium Toys' security posture.

There are multiple controls that could be established to improve the security posture of Botium Toys, such as: introduce the least privilege and separation of duties system, have disaster recovery plans and backup of critical data, have a centralized password management system that enforces the password policy's minimum requirement, use data encryption and IDS, and manual monitoring, maintenance, and intervention for legacy systems.

To address compliance, multiple controls will have to be implemented, such as: introduce the least privilege and separation of duties system, using encryption, using secure password management policies, and ensure data is properly classified and inventoried to identify additional controls needed to better protect sensitive information.
